EDUCATION

University of Miami
Bachelor of Science in Computer Science and Motion Pictures Screenwriting
Minor: Interactive Media

Graduated: July 2026

- Relevant Coursework: Interaction Design, Front End Fundamentals, Physical Computing, Wearable Technology, Data Structures and Algorithm Analysis

EXPERIENCE

The Miami Hurricane
Staff Writer and Communicator
Miami, FL

December 2024– May 2026

- Applied audience research and narrative structure to craft clear, engaging content under tight deadlines.
- Conducted interviews and synthesized source material to ensure accuracy and clear information architecture across published pieces.
- Collaborated in feedback-driven team cycles to pitch, refine, and improve published work.

Private Music Studio
Violin Instructor (Self-Employed)
Miami, FL

October 2023 – August 2024

- Adapted complex instructional techniques to match individual learning styles and cognitive needs for students ages 14-16.
- Developed structures progression plans and tracked student performance metrics to refine instruction.

PROJECTS

Study App - UX/UI Case Study
Technologies: Figma

- Designed a mobile application interface and interactive prototype focused on reducing cognitive load and improving peer collaboration during study group engagement.
- Conducted user interviews to uncover friction points, translating insights into user personas, journey maps, and low-to-high fidelity wireframes.
- Built a clickable, high-fidelity prototype in Figma to test user flows, navigate hierarchy, and component usability.

How to Die in Space - Interactive Planetarium Experience
Technologies: Adobe After Effects, Adobe Illustrator

- Collaborated in a cross-functional team of 4 to design and animate immersive visual assets for a dome-format planetarium exhibit at Frost Science Museum
- Adapted the core visual experience into an entryway animatic based on visitor flow analysis, increasing exhibit engagement.
- Collaborated with museum staff to align visual storytelling and information hierarchy with educational goals.

Kinetic Plant Growth Installation
Technologies: Circuit Playground Express, Arduino IDE, Circuit Python

- Design an interactive physical diorama using a Circuit Playground Express microcontroller to simulate plant growth through responsive servo movement.
- Programmed microcontroller logic and NeoPixel lighting to deliver responsive, real-time feedback during user interaction.

SKILLS

UX and Design Methods: Wireframing, High-Fidelity Prototyping, Usability Testing, User Interviews, Information Architecture
Design Software: Figma, Adobe Creative Cloud, Storyboarding Design Systems
Technical Familiarity: HTML/CSS, JavaScript, Physical Computing (Arduino), Git/GitHub
